

Press Release

Headline 1: Sunkind Energy joins hands with JA Solar to boost solar cell & solar module manufacturing in India

OR

~

The partnership aims to strengthen India's solar manufacturing capabilities through advanced solar cell technologies and global best practices.

Gurugram, June 2025 — In a significant move to bolster India's domestic solar manufacturing ecosystem, Sunkind Energy Limited, one of the country's fastest-growing one-stop solar solution firms, has entered into a technical partnership with JA Solar, a globally renowned Tier-I technology leader known for producing high-efficiency solar products.

As part of the MoU, Sunkind will leverage JA Solar's advanced technical expertise and raw-material supply chain to enhance its solar cell and solar module manufacturing capabilities at its upcoming 2.4 GW PV cell and 4 GW module facilities. The collaboration aims to integrate global best practices and upcoming high-efficiency technologies, positioning the home-grown firm as a provider of high-performance solar products in India's clean-energy landscape.

*"As India accelerates its transition towards renewable energy, the demand for high-performance solar solutions is at an all-time high. This growing need calls for innovative technologies, reliable manufacturing, and sustainable deployment strategies to ensure energy security and meet ambitious climate goals," said **Hanish Gupta, Founder & Managing Director of Sunkind Energy.** "Through this collaboration, we aim to deliver world-class solar cells and modules that support India's vision for self-reliant, future-ready industrial growth."*

Virpal Yadav, Director & COO of Sunkind Energy, said, *"At Sunkind Energy, we are committed to delivering precision-led products that meet global performance benchmarks. This partnership enables us to adopt cutting-edge technologies and process standards that will translate into superior efficiency, reliability, and long-term value for our clients and partners."*

Aiqing Yang, Executive President of JA Solar, said, *"India is one of the most dynamic solar markets in the world, and we are delighted to join hands with Sunkind Energy in advancing high-efficiency solar cell and module manufacturing in the region. Through this strategic collaboration, we aim to share our technical expertise with Sunkind, enabling the development of a robust, quality-led manufacturing ecosystem aligned with global standards."*

The announcement comes at a time when India's solar industry is undergoing rapid expansion. In 2024 alone, the country added 30.7 GW of new solar capacity — a 145 % increase over the previous year — making India the third-largest solar market globally.

JA Solar's leadership in advanced cell technologies such as TOPCon, paired with its proven production methodologies, will strengthen Sunkind's operational capabilities as it enters the solar manufacturing domain. The partnership is expected to enhance both output and quality, while aligning with international benchmarks.

This collaboration also contributes to India's national goal of achieving 500 GW of renewable energy by 2030, with solar projected to account for over 200 GW. By investing in high-efficiency domestic manufacturing, Sunkind is contributing to reducing import dependency, generating green employment, and accelerating India's transition to a sustainable, technology-led energy future.

About Sunkind Energy

From engineering excellence to building the energy backbone of Industrial India, Sunkind Energy is crafting solar solutions that go beyond projects — they drive national progress. Founded in 2019, the company has rapidly emerged as one of India's fastest-growing solar firms, with a strong track record in Solar EPC-turnkey execution, and performance-led clean energy infrastructure.

With over 150 MW of projects delivered and a growing footprint across multiple states and diversified sectors in India, Sunkind India Limited is now expanding into solar cell and module manufacturing, energy storage, and EV infrastructure, Single axis tracker based module mounting, strengthening its role in India's clean energy transition.

Powered by innovation, built on trust, and driven by a bold vision for a cleaner, self-reliant tomorrow, Sunkind Energy is helping shape a future where industrial growth and sustainability move forward — together.

About JA Solar

Founded in 2005, JA Solar is a global leader in photovoltaic power generation solutions. With vertically integrated manufacturing and a strong international presence, the company provides high-efficiency PV products and services to customers in 178 countries and regions. As of Q1 2025, its cumulative shipments of solar cells and modules have exceeded 280 GW.
