Sunkind Energy Shines Bright, Set to Energize Solar Infra Boost with 5 Major Rooftop Projects

New Delhi, 06/05/2024: Sunkind Energy, a pioneer in solar solutions, has secured five solar rooftop projects, paving the way for the growing renewable energy sector. By expanding its presence in commercial and solar installations through these important projects, Sunkind Energy has established itself as a leading player in solar engineering, procurement, and construction (EPC) services, especially in North India. The company has won projects of combined capacity of 10 MW in states like Punjab, Haryana, Rajasthan and Chhattisgarh.

With its significant progress in the development of India's solar energy infrastructure, Sunkind has left indelible green footprints encompassing diverse industries across the country. The company will work on these solar rooftop installation projects for the prestigious industry players such as Cedaar Textiles Private Limited, ABREL Solar Power Limited--subsidiaries of the Aditya Birla Group, Jindal Stainless Limited, Jindal Steel and Power Limited, and SBF Rapid (TMT).

Continuing its brand legacy, Sunkind has earned several accolades for its unstinting commitment to delivering top-quality solutions. In the renewable energy market, the company has carved its niche by excelling in solar engineering, procurement, and construction (EPC) services. In its effort to amplify competitiveness and reduce project costs, Sunkind has spotlighted the development of proprietary solar tracker systems and the establishment of its own solar panel manufacturing line, which will see the light of the day in 2025.

Hanish Gupta, Founder and CEO of Sunkind Energy, says: “At Sunkind Energy, we take immense pride in leading the charge towards expanding solar infrastructure in India, thereby fostering a cleaner and more sustainable energy future for generations to come. Our unwavering dedication to excellence and innovative solutions has firmly established us as a trusted partner in driving advancements in renewable energy. As we continue our mission, we remain

steadfast in our commitment to collaborate with the government in achieving climate action goals and reaching the target of net zero emissions by 2070. We prioritize integrity and reliability in every aspect of our operations. Sunkind Energy believes in delivering end-to-end solutions directly to its clients, rather than subcontracting or delegating projects to smaller vendors. This approach ensures seamless maintenance and operations, safeguarding the long-term success and sustainability of our projects. At Sunkind Energy, we are committed to upholding the highest standards of quality and accountability in all that we do.”

Furthermore, Sunkind is transitioning towards a utility-scale developer model, aiming to invest in long-term power purchase agreements (PPAs) and utility-scale projects. This strategic shift promises improved business viability and faster return on investment compared to traditional EPC contracting.

In addition to solar initiatives, Sunkind is actively involved in energy storage systems, integrating solar energy with battery storage for enhanced energy independence. The company is also working on solar park development projects in Chattisgarh, Rajasthan, and Haryana, advocating for capital expenditure (Capex) models to accelerate solar adoption among visionary entrepreneurs and businesses.

Sunkind's commitment extends beyond project completion, offering lifetime operation and maintenance solutions to ensure sustained performance and client satisfaction.

About Sunkind Energy:

Since our establishment in 2019, Sunkind Energy has evolved from an EPC Company to a leading player in India's solar industry. We manufacture a large portion of our solar components in-house and are also making strides as a renewable energy developer. Committed to ethical practices, our team excels in delivering cutting-edge solar solutions. We prioritize excellence, innovation, and environmental responsibility, ensuring a sustainable energy future. As leaders in solar EPC, we take pride in our strength, integrity, and dedication to providing top-quality services to our clients.
